Subject : Persons not accepted for CAPEN-CPEPEN, SS-59

The following names are candidates for bôlsas whose applications were not approved by PABAEE for inclusion in the second semester courses of PABAEE, for the stated reasons.

These persons and their state Secretary of Education are being informed of these same reasons, and where applicable, invited to reapply for courses to be offered in 1960.

1. Clotilde Guedes de Macedo

This applicant, from Rio Grande do Norte, was the only candidate from her state not accepted for second semester courses offered by PABAEE.

She lists her current work on her INEP form as being a "Professôra", acting as a "diretora", and on her PABAEE form as being the "diretora" of a Grupo Escolar. In none of her application data was there any indication that she was involved in the direction of a "escola anexa", or demonstration school which would make her eligible for the PABAEE courses, nor was her name included on the list of persons whom her Secretary of Education indicated would return to positions of teacher training in Rio Grande do Norte following these courses.

This latter lack we considered to be a major lack in her credentials, since PABAEE's major goal is the training of persons currently involved in teacher education, or persons for whom PABAEE can receive guarantees that positions in teacher education will be available upon completion of PABAEE's training.

No such evidence was presented for Professôra Clotilde. She is being invited to secure additional documentation and apply for a bôlsa in 1960.

2. Loide de Souza Baena, from Paraná, whose age (20 years) and experience (only two years) were not in her favor.

Additionally, she currently teaches Geography, History and Music in a normal school in Paraná, but sought a bolsa in Psychology, with a second area of interest in Science. For neither of these preferences did she present adequate documentation to indicate to PABAEE that her training would in anyway make her an equal of those persons who will be receiving such training in the second semester.

An additional factor was that she presented no evidence from her superiors that she would be released from her position, that her state would continue to pay her salary, nor that any bolsa was possible for her for this course.

She is being invited to secure such necessary documentation and indicate to PABAEE more of her professional training and probable future, and will be considered for a bolsa in course in 1960.

3. José Maria Pegoraro, of the state of Paraná, who apparently misunderstood the intent of the PABAEE courses. José is a teacher of Portuguese in secondary schools of Paraná. His application did not contain any authorization by his Secretary of Education that José met the qualifications for the courses, or that his state would assume responsibility for his future nor for his salary in the period of his training.

He is being informed more specifically of the intent of PABAEE's training courses, and invited to re-apply, if he qualifies.

4. Maria Terezinha Leal Santos, of Rio Grande do Sul, is involved in Kindergarten teaching at the present time. Her application was for Psychology, with out any evidence of previous training in the area, nor indications of her future in the state of Rio Grande do Sul.

5. Margarida Soares Costa, from Minas Gerais, whose age (55 and the area of her application were not in her favor. She was interested in Psychology, and qualifies by her documents as a reasonable candidate, but her application was superceded by four others from Minas Gerais. Since only ten bolsas can be offered in Psychology, we believed that other states must receive some consideration, as well.

PABAEE is inviting Margarida to re-apply for courses in 1960 if she will also provide some indication as to how many years of professional life she plans to have before retirement.

6. Maria Lúcia Camelo Lopes, of Ceará. Her present position is not in teacher education areas, nor did she present any documentation from her Secretary of Education that she was bringing his recommendation. Indeed, she is not

currently involved in public education, but in a private school.

7. Nildes Alencar Lima, of Ceará. The same facts apply to her as to the candidate # 6 of this list. Current position is not in public education, no approval of the state Secretary of Education.

Candidates Maria Lúcia Camelo Lopes and Nildes Alencar Lima of Ceará are being invited to present official documentation prior to the time when they can be actively considered for PABABE bôlsas.

Several other candidates for Paraná presented applications with no official approval of their applications. Their documents were returned to them inviting them to re-present those documents with official approval of their Secretary of Education. Until the date of this writing, none of these applications have been returned to PABABE for consideration for bôlsas for the second semester courses. In fact no additional bôlsas are available for these courses, if those approvals arrive as expected.

An accompanying memorandum includes the names, states, areas of specialization and source of bolsa for all members approved by PABABE for second semester training, for your information.
